Battery holde

High compatibility with peripherals makes for more

High-speed Transfer of Screen Program

Large-volume screen program edited by "V-SFT Plus ver.6" configuration software can be downloaded/uploaded at high speed.

Compatible with "PictBridge" Printers

Supports "PictBridge" for printing digital camera and printer via USB connection. With PictBridge-enabled printers, you can easily print daily, weekly, and other materials on-site.

Front mounting interface compatible

In order to take advantage of the characteristics of USB devices, which are often connected and disconnected frequently, we have prepared an interface that allows you to place the USB port in the front.

Communication Features

Multi-communication using the gateway functions

It is capable of the connection with up to eight devices by combining Ethernet and serial communication. More advanced and expanded network can be now realized.

8-way Communication * Except of module without the Ethernet port

A combination of Ethernet (eight protocols) and serial communication (three protocols)^{×1}, which enables connection among a AnyTouch (W8p/W9p) and up to eight kinds of devices consisting of PLCs and peripherals of different manufacturers.

- Simultaneous communication and data transfer with eight kinds of devices
- Simultaneous monitoring and operation of multiple PLCs and peripherals
- Linkage between a AnyTouch (W8p/W9p) and various devices on the LAN network using the gateway function

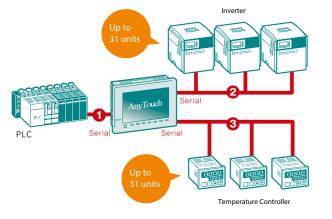

%1 W806iCDp with 2 protocols

Network Examples

Example Serial connection (three ports)^{×1×2}

Making a network linked with various automation devices

PLCs and peripherals of up to three kinds of units can be connected by serial connection. Even though two or more types of temperature controllers and inverters are used, they can be connected with one AnyTouch (W8p/W9p).

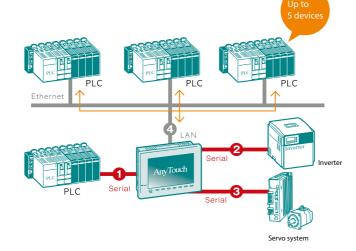

※1 Except W806CDp %2 W806iCDp can be used only with DUR-00 option

Example 2 Serial connection^{%1%2} and Ethernet

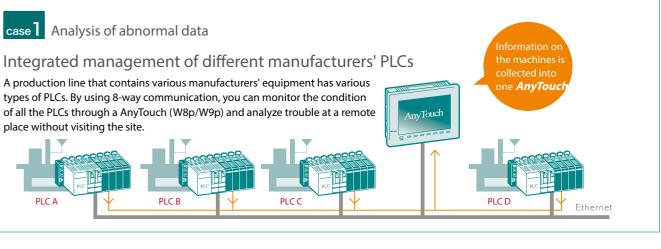

Integrated management of up to eight kinds of devices

In addition to conventional connection with temperature controllers and PLCs via 2-way serial communication, connection via Ethernet is possible.

8-way communication offers various functions and boosts your convenience

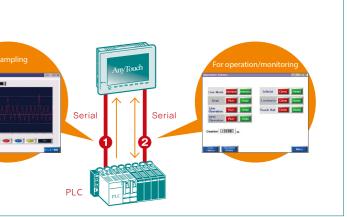

case2 Connect more than 32 kinds of equipment

Available from large scale system

Use several communication port to connect more than 32 kinds of equipment. Even when the system consists of more than 32 kinds of equipment including temperature controller and inverter, it is possible to read and write the data through 8-way communication of AnyTouch (W8p/W9p).

Easy Configuration

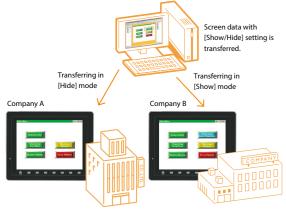

Highly Functional Switches

Switches with various functions are standardized, No macro or PLC ladder programming is required.

Indication according to individual production sites needs

Static conditional visibility

You can set whether or not to show an item while creating a screen, item by item. One screen data can be utilized for different applications.

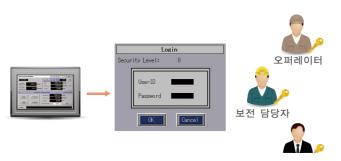

Display of memory status Status of display item can be changed according to status of memory.

Best Performances & Convenient Functions Conditional visiblity according to the security level

1. It can be displayed differently according to the level of security according to the operator such as maintenance engineer and operators.

2. You can set the security level according to the entered password by dividing the security level (16 steps).

Convenient functions to meet users' demands

Large capacity of flash memory, SRAM and many other functions for more user friendliness

Operation Log

Record chronological on-screen input, from switch operations to numerical inputs. By using the password function together, you can easily analyze the history and the anomalies of who / when / what / how.

BIN file

W9 Plus Series

Save history logs as a binary file. No risk of data tampering

26MB Flash memory

Approximately 26MB flash memory is installed as standard. Without including the external memory card, user can freely design and layout the screen data

※ Except W806(i)CDp

128KB SRAM as standard

Approximately 128KB backup memory is installed as standard. The ability to backup historical data such as sampling data, operation information and alarm information is greatly imporved, which is effective for information management required by ISO. User can also use it freely with urser memory. ※ 512KB for W806iCDp

V-SFT PLUS Ver.6

Imporoved in visibility and operability makes more perfect implement of screen with only a simple operation.

Upgraded Beautiful GUI

Wider Range of Parts

 New plain part has been added with the update of previous Real/Sign part. Possible to make stylish and beautiful display with only

 the part that is built already.

 • Newly added the plain part

 • Increased REAL parts

data.

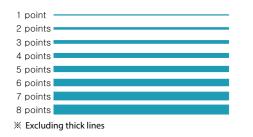

Pasting of an Image File

Line Width Setting

The line widths of graphic items and trend items (graph lines, reference lines) can now be set in eight steps. Effective screens can be created using a variety of drawing tools and graph representations.

Copy / Paste of Microsoft Office

Graphics created in Microsoft Office Word, Excel and PowerPoint can be copied and pasted into V-SFT Plus files by converting them to pictures, patterns or parts.

User can paste image data in PNG format, which is light in

weight and hard to deteriorate, directly on the screen. In

addition to the PNG format, you can attach JPG, BMP, and GIF

images directly, so can easily create a clean image using image

Compatibility with Previous Models

Support of converting from the old models

User can convert the old model screen data created in the previous version V-SFT Plus to the current model as it is. Possible to utilize the old model screen data assets. (Editable for all models, V9p series, V8p series, W8p series and W9p series)

X Impossible to convert from V Plus series to W Plus series X Except of W806(i)CDp (Compatible with V806p series)

Upgraded Operation

Ribbon Menu

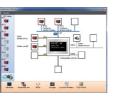

W8p, W9p series.

[Home menu]

The ribbon-shaped menu bar is available. Enlarged icons are easily visible also improves the [Part menu] operability remarkably.

Configuration Menu of the Connected Device

Can be recognized instantly the hardware setting menu from connected devices on V9p,

Character String Table (V9p series)

Text for switches, lamps and other parts can be managed centrally using the character string table. Frequently used text can be registered in the table for easy reference and batch modification.

X Switches, lamps, text and multi text only

Facilitation of Screen

Tool Hints to Support Configuration

Tool hits are provided at many points to support configuration. When user hover the mouse over the item, a hint for operation will appear. User can learn the procedure for configuration without referring to the manual.

Continuation Device Fore Life Actionologouese Est The bit is of (ON on completion of Acknowledge. Strange Odayal Bit The bit is of (ON on completion of Output to Storage.

Direct Editing with the Item View

In the item view, an indication range and component parts consisting of various parts including switches are selected. Since there is no need to select various items respectively, smooth and efficient editing is possible.

[Edit menu]

[Display menu]

Docking Windows

The project view windows and item view windows can be docked or floated easily.

The search menu, which used to be displayed sperately, has now been integrated for easy operation.

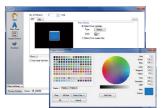

Guided Setting Process

With the help of the clear instructions in the dialog, setting can be conducted smoothly and collectively.

A Wider Range of Colors for Parts

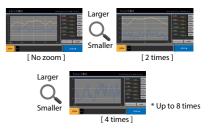

65,536 colors are availble for components parts.

Trend Sampling

Chronologically records a broad-range of data that changes over time to display as trend graphs.

 \cdot Enlarged Display Support : Enlarge the display for a particular area of the screen to verify changing waveforms of trend graphs in even more detail.

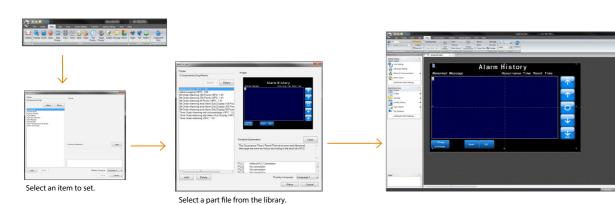

"Component Parts" facilitate screen configuration

Convenient tool assists user in creating functional screens instantly.

Component Parts First in Industry

Drawing Software

In "Component Parts" various functions and macros have been arranged according to purpose. User can create a functional screen instantly by simply selecting a "Component Parts" from the parts list and placing it on the screen.

Selected parts placed on the screen can be used with no or minimum additional setting.

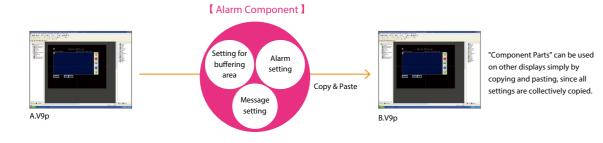

Point Easy Screen Configuration

User can create multifunctional screens using integrated "Component Parts" when arranging on a screen that contains other messages or setting windows, a "Component part" can be used regardless of overlapping of settings or windows.

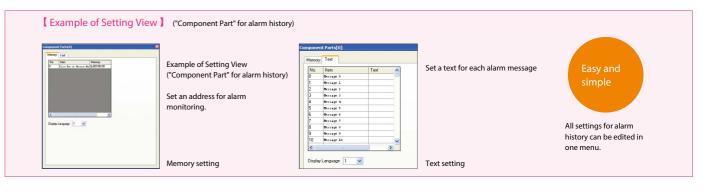

Point 2 Easy Utilization of Resource

"Component Parts" contain all necessary settings for operation, therefore do not need any additional setting when used on other displays. They can be used simply by copying and pasting.

Point 3 Simply Setting View

After placing "Component Parts" they can be easily used simply by setting addresses and texts.

Point 4 Batch Change of Addresses/Texts

When the same address or text is used for multiple screens, all the settings can be changed simultaneously on the setting view simply by registering it in the address/text table of a "Component Part"

"Component Parts" with various functions are available. They can be selected from the parts list accoring to your purpose to configure displays promptly.

Displays for monitoring and parameter setting of temperature controllers can be made easily.	Displays for monitoring and parameter setting of inverters can be made easily.	Displays for mo operation settir can be made ea

Point 5 Authorization by Passwords

Setting a password for a "Component Part" prevents the setting for the part from being changed by unauthorized person. Customers can use a "Component Part" without having to worry about tampering of the setting.

ng of robots

Displays for I/O mornitoring of PLCs can be made easily.

Displays for date setting can be made easily

Expandability with MES / Ethernet

Supporting the construction of advanced MES

AnyTouch (W8p/W9p) networking promotes the integration of sales, production management and manufacturing at low cost.

MES^{*1} Interface Function^{*2}

Data for production records, defect quantity, error causes and various kinds of information can be sent to the MES database server via V-Server in SQL of AnyTouch (W8p/W9p). Communication with the database is possible without a gateway PC or complicated programming.

No Programming Required

Data can be saved in the database server by simple setting on V-SFT Plus ver.6. Therefore no programming is required.

Preventing Data Loss

All data transferred to the database is saved with the error log, therefore it is completely secure.

Serial

Decresing System Load

Data can be transferred to the database server of AnyTouch (W8p/W9p) when conditions are fulfilled. The server does not need to keep monitoring production, therefore the load on system can be decreased.

%1 MES (Manufacturing Execution System) : The "Manufacturing Execution System" is for optimizing product quality, product quantity, delivery date, cost, etc. in the management/control of production sites. %2 For Ethernet module only.

Function of extension with Ethernet

FTP Server

PC can read and write the data of AnyTouch (W8p/W9p) with FTP Server function. Data transfer by universal communication protocol, therefore it does not need for an application program.

Remote Desktop

Display of PC can be shown on the AnyTouch (W8p/W9p) screen by connecting Ethernet. It is possible to check work standard or manual which is stored in office PC.

VNC Server

VNC Server function enables the operation, share and surveillance of the 'W9 Plus Series' screen on the remote site through a simple software installation such as VNC viewer. Moreover, Wireless LAN function can work without cable connection more conveniently.

V-Server The V-Server realizes production data collection and production control via LAN. One V-Server can control multiple AnyTouch (W8p/W9p) units without adding **AES** data optional functions to AnyTouch (W8p/W9p). PC Transmitting the data sent from AnyTouch (W8p/ W9p) in SQL. Sending a production instruction request or production result Etherne nyTouch nyTouch without

Even from abroad, remote monitoring and control can be used with V-Server environment via Web. It is possible to use automatic alarm notification or remote monitoring, etc. by using network and server function of Ethernet & Web. And error and problem can be prevented by gathering and analysing error data. It can reduce downtime so that increase productivity.

Feature of V-Server

- Gather and store data of PLC • Gather and store sampling data of AnyTouch (W8p/W9p)
- Gather and store recipe data
- · Send an email by alarm mornitoring function
- Control data with application program of PC by DDE function
- Transfer display data of AnyTouch (W8p/W9p) via Ethernet

Please contact RS Automation Co., Ltd. for detailed function of V-Server.

Web Camera (Motion JPEG)

Recorded by Web camera, JPEG motion and image files can be played in AnyTouch (W8p/W9p) via network. It is help to check whole site of the factory line.

Web Browswer

It is possible to browse HTML and image files on internet with AnyTouch (W8p/W9p).

TELLUS and V-Server Application program that can connect office and production site with low cost.

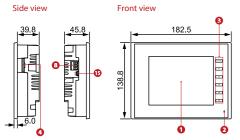

Increase the productivity with remote and gathering data functions

	USB	Type mini-B (Ver. 2.0)	Type A, Type mini-B (Ver. 2.0)
Battery	Battery specification	Lithium Battery / 5 years (Surro	unding air temperature 25°C)
Power Supply	Rated voltage	DC 24V	±10%
i onci suppiy	Power consumption	13W o	
	Surrounding air temperature	0~+50	
	Storage surroudnign air temperature	-10 ~ +6	
Physical Environment	Operational/Storage ambient humidity	85% RH or less (Without dew condensation	
i nysicai zinnoinnene	Altitude	2,000m c	
	Atmosphere	No corrosive gas, no excessive	
	Pollution Degree	2	
	Dimensions W x H x D	182.5 x 138.8	
Installation Conditions	Panel cutout dimensions W x H	174 x 131	
	Surface sheet	Front panel : Compliant with IP65 (Option : use of wa	aterproof gasket), Rare panel : Compliant with IP20
		Black

Option Unit

Various units for greater expandability and usability

General Specifications

Mounting Unit

Communication Unit

CUR - xx (Communication Inteface Unit) XX Compatible network XX Compatible network 00 OPCN-1 04 PROFIBUS-DP 06 SX bus 07 Devicenet T-Link 01 02 CC-Link 08 FL-net 03 Ethernet

Connected to various networks. Multiple W8p panels can be connected to one PLC. Other devices can be linked to the network, improving system's cost-effectiveness.

※ W806iCDp Only

Cables

	Туре	Configuration	Connected to
	V-CP	RS-232C Modular 8 pin D-Sub9pin(凹) 卧 配① Cable Length : 3m	PC
W8p	V6-BCD	RS-232C Modular 8 pin IP IP Cable Length : 3m	Barcode Reader
/Vp	V6-MLT	RS-422 Modular 8 pin FTD Cable Length : 3m	V8p/V7/V6 Series
	V6-TMP	RS-232C/485 Modular 8 pin IP IE Cable Length : 3m	Temperature controller and Inverter etc.
W9p	UA-FR	P D Cable Length : 1m	USB-A Port

Options

TC-D9 (Terminal Converter)* Connects W8+ with other units via RS-422/485 terminal. ※ W806iCDp Only

DUR-00 (Option Unit)* Used for serial connection with D-Sub 9 pin. X W806iCDp Only

V906T-GS/V906T-GSN10 Protection sheets for panels N10 is a non-glare type sheet (5 sheets per set) ※ For W806p Series

TS1070S-WP/TS1100S-WP (Waterproof Gasket) For IP65 protection structure required. Can be used with/without Ethernet.

TS - BT (Replacement Battery) A replacement lithium battery (CR2032W of Sony Energy Devices) ※ For W806p Series

※ For W9p Series

CR2032 (Replacement Battery) A replacement lithium battery ※ For W9p Series (Please contact Sales person for purchase.)
