i-COBOT
Product Introduction

AiCON
AI Control

Product Introduction

1. Ambient light detection
2. Temperature and humidity measurement
3. RGB LEDs
4. Maze Escape
5. Radio control
6. Sound detection
7. Line tracer
8. Melody playing

A lot of content can be realized through multiple sensors

i-COBOT is Possible

Measure the brightness of the surroundings through the illuminance sensor

Measure ambient temperature and humidity with temperature and humidity sensor

Combining red, green, and blue light to output various colors

Recognize surrounding obstacles with IR sensor to find an exit and escape

Control i-COBOT through wireless communication with PC/smartphone with Bluetooth module

Detects ambient sound through microphone

Distinguish black and white through IR sensor and move along the line

Play a song by generating a continuous scale value (frequency) with a mini speaker
