

PRODUCT CORE CAPABILITY

Reliable Passability

With a minimum channel chassis diameter of 55cm, Mini is guaranteed to operate flexibly in small spaces.

Multi-Robot Cooperation

When the paths of more than one Mini intersect, intelligent priority numbering allows them to avoid collision without the need for human intervention.

Interactive Capabilities

Specially developed voice and visual capabilities guarantee a first-class interactive experience. Mini detects the presence of people and takes the initiative to greet and interact with them.

INTRODUCTION

ORION STAR is a leading global service robot solution company founded in September 2016. It employs self-developed, full-chain artificial intelligence technologies such as voice interaction, and visual navigation and integrates unique product development and technical application capabilities. ORION STAR has released ORION STAR AI Greeting Robot, AI Robot Greeting Mini, Lucki, and Robot Coffee Master on the basis of its robotic arm platform. It has established the OrionOS, an open platform for Orion robots, and is driven to use AI technology to empower more people with really useful robots.
